

Viewport Scenarios: The Ceiling in Action

Precise Mathematical Rendering (Scale: 1 unit = 100px)

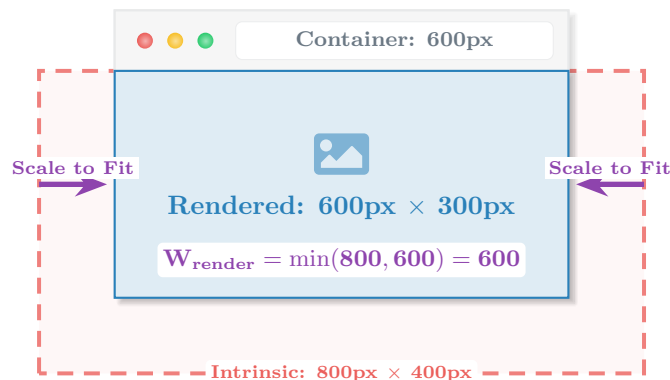

1. Desktop Viewport ($W_{\text{container}} = 1200\text{px}$)

$1200\text{px} > 800\text{px}$. Ceiling activated. Image refuses to stretch, centering logic applies.

2. Tablet Viewport ($W_{\text{container}} = 600\text{px}$)

$600\text{px} < 800\text{px}$. Ceiling enforced. Image mathematically forced to scale down to fit container.

3. Mobile Viewport ($W_{\text{container}} = 300\text{px}$)

$300\text{px} \ll 800\text{px}$. height: auto strictly preserves the intrinsic 2:1 aspect ratio on vertical axes.
