

Art Direction

Intent: Deliver a **differently cropped** or **modified** image based on the context.
The primary goal is **visual clarity** and keeping the subject prominent on any screen size.

```
index.html

HTML Implementation (Art Direction)
<picture>
  <source media="(min-width: 1024px)"
    srcset="desktop-wide.jpg" />
  <source media="(min-width: 600px)"
    srcset="tablet-medium.jpg" />
  
</picture>
```

Key Concept

The image content **changes entirely**. We supply distinctly tailored, cropped variants to ensure the primary subject doesn't become invisibly small on mobile devices.
